WORK EXPERIENCE

Associate Software Engineer 01/2026 – present

Autocrat Engineer

- Integrated **GitHub Copilot** into team workflow; reduced boilerplate generation time for forms and API clients by ~30%.
- Created Custom middleware for authentication, input validation, and Centralized error handling, ensuring consistent **API** responses through **Express.js.**
- Integrated **RESTful APIs** to connect frontend applications with backend services and databases, enabling seamless, real-time data exchange and improved application performance.
- **SQL** proficiency As designing and writing complex queries, multi-table joins, aggregations, window functions, and CTEs for robust data retrieval and analysis.
- Proficient in **Shadcn** Website which is usually deals with accessible components with thoughtful defaults which actually Works with all React frameworks.
- Awareness of **Apollo Client** functions, including **GraphQL** queries, mutations, caching, and frontend data management.
- Familiarity with **Webpack** and frontend build processes, including module bundling, loaders, plugins, and development/production configurations.
- **Frameworks** & **Libraries**: React.js, Next.js, Express js, Tailwind CSS, Material UI (MUI), React Router, Axios.
- Used **Chrome DevTools** for inspecting HTML and CSS, debugging JavaScript, analyzing API requests, troubleshooting UI issues, and testing responsive web layouts.
- Data visualization expertise using **Power BI**: dataset modeling, **DAX** measures, interactive reports, and end-to-end dashboard development for business reporting.
- **Stack**: React, JavaScript, Typescript, Apollo GraphQL, React Query, Node.js, HTML, CSS.

SKILLS

REACT | PYTHON | REDUX | HTML | CSS | JAVASCRIPT | TYPESCRIPT | NODE JS | GRAPHQL | TAILWIND CSS | NEXT.JS | AXIOS

PROJECTS

Autocrat Manufacturing ERP 05/2026 – present

- Mapped **SAP Business One Service Layer** manufacturing/ERP functionalities to frontend workflows through API integrations, translating enterprise business processes into interactive React interfaces.
- Developed **RDBMS-backed** Work Order Management with **CRUD** operations, search/filtering, pagination, status tracking, KPI metrics, and production analytics.
- Designed and implemented reusable enterprise UI components including KPI dashboards, data tables, advanced filtering, forms, dialogs, tabs, calendars, scheduling views, timelines, progress indicators, notifications, and interactive charts through **Typescript**.
- Integrated **3D visualization** concepts using **Blender** and **CSS**-based UI styling to enhance manufacturing-oriented visual representations and create a more interactive enterprise interface.

Autocrat Leave Tracking System

- Built interactive interfaces for leave applications, approval/rejection workflows, leave balances, calendars, status tracking, and historical records.
- Added dashboard-style summaries and visual indicators to provide quick visibility into leave utilization, pending requests, approval status & **Sandwich Method**.

SOFT SKILLS

Cross-Functional Coordination | Analytical Thinking | Communication | Management | Presentation Skill

EDUCATION

BSC ELECTRONICS

Khallikote Unitary University

2023-2026

CGPA – 8.79
